

## XELTO.COM account. Enable 2-step authentication

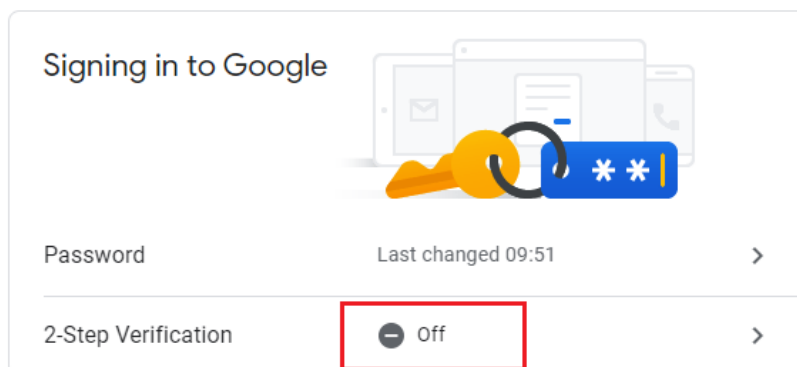

1. Go to <https://myaccount.google.com/> and type your user and password. Click on icon in the top-right corner of the screen and ensure you are logged into @xelto.com account.

2. Click on security on the left menu:

3. Go to Signing into Google and click on Off button as below.

#### 4. Start configuration (click on Get Started button)

##### Protect your account with 2-Step Verification

Each time you sign in to your Google Account, you'll need your password and a verification code. [Find out more](#)

Add an extra layer of security

Enter your password and a unique verification code that's sent to your phone.

Keep the bad guys out

Even if someone else gets your password, it won't be enough to sign in to your account.

#### 5. Type your phone number and select Text Message option

##### Let's set up your phone

What phone number do you want to use?

Google will only use this number for account security.  
Don't use a Google Voice number.  
Message and data rates may apply.

How do you want to get codes?

Text message  Phone call

Step 1 of 3
